EXTERNAL SCREENS

Standard Screens primarily offers protection against excessive solar exposure. This means you can save on air conditioning costs. Reduction of sunlight even up to 75%, and therefore limits the running costs of the building. A considerable advantage of the screens is that they can obscure glassed areas up to a width of 5 m or to a surface of 15 m². The high quality of the fabric which has a rich colour spectrum heightens our sense of the aesthetic.

Operation – screen rollers can be operated both by remote control and a switch. The rollers can also be connected into groups and a drive mechanism installed with a sensor identifying any obstacle

EXTERNAL SCREENS

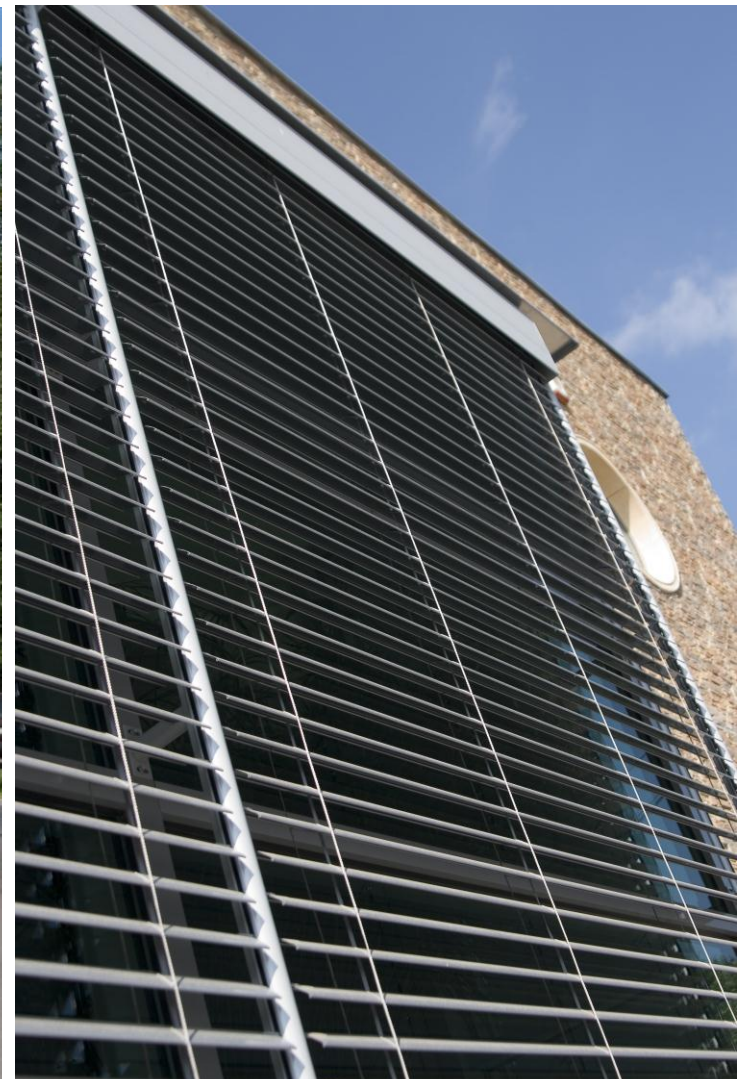

EXTERNAL VENETIAN BLINDS

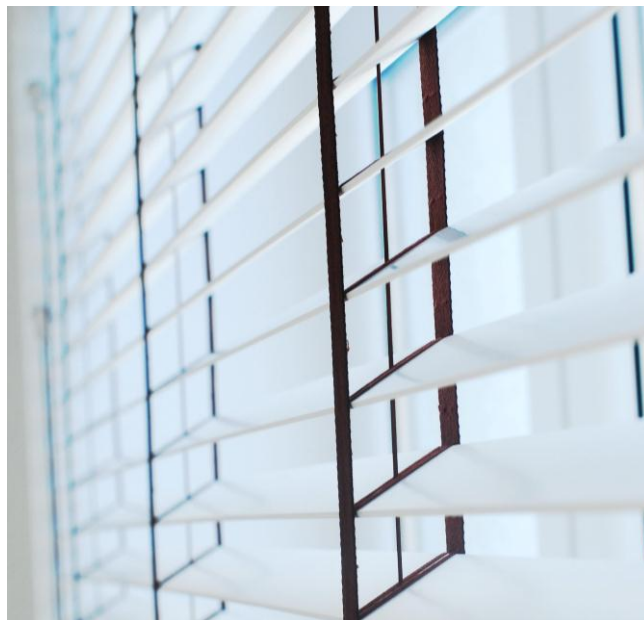

- effective methods of protection against solar radiation and noise,
- fluent regulation of light access to the room,
- resistance to weather conditions and long durability of the product,

EXTERNAL VENETIAN BLINDS

INTERNAL VENETIAN BLINDS - Wood & Bamboo – Scandinavian Style

INTERNAL VENETIAN BLINDS - Wood & Bamboo

INTERNAL VENETIAN BLINDS - Aluminum

ROMAN BLINDS

VERTICAL BLINDS

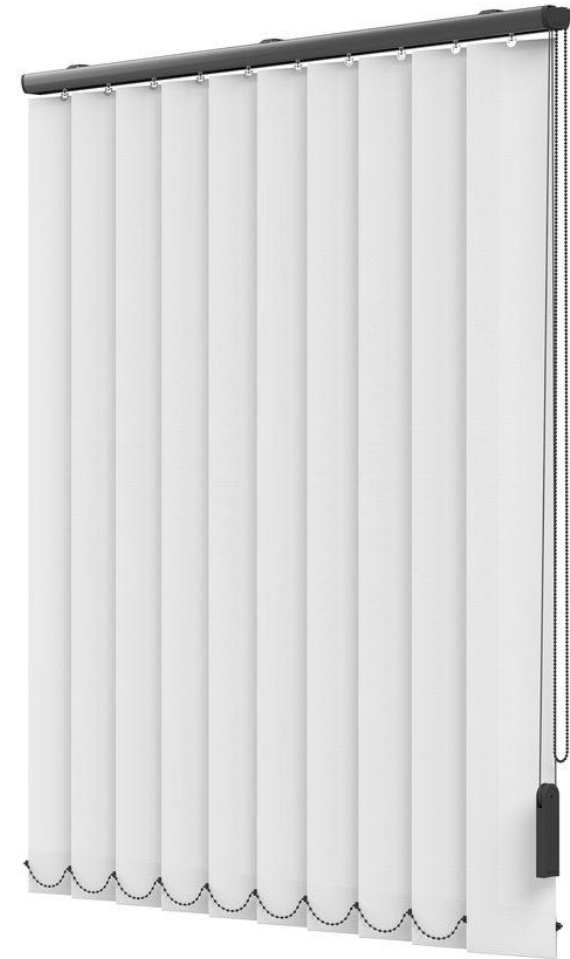

A solution for offices, conference rooms, halls.

This is the optimal solution to obscure large surfaces, particularly in office premises, conference rooms, halls etc. Their advantage is the precise regulation of the direction and amount of light beams coming in, because the vertical lamella turn. They offer ideal protection preventing the premises from excessive overheating. To improve the operation of the vertical blinds they can be fitted out with a mechanism, which enables them to turn, opening and closing the lamella of the vertical blinds.

A wide range of colours and patterns of fabrics providing various degrees of obscurity (by a width of lamella 127 mm or 89 mm) allows the blinds to blend well into the existing interior surrounds, PVC lamella are also available.

Our offer also includes materials with a hygiene certificate and non-combustible certificate.

Profile colours: white, grey

PLEATED BLINDS

The rich collection of fabrics, typified by the variety of designs and colours, means it is possible to plan a pleated shade in any premises. The most prominent attribute of pleated shades is the flexibility in construction, as, with the exception of the variants below, the pleat can be tailor made to your individual needs and plans.

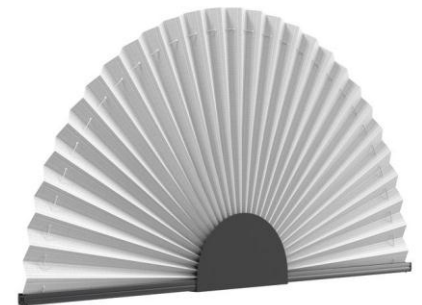

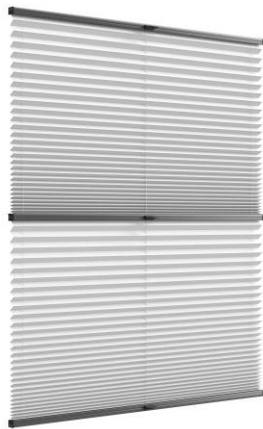

Main advantages:

- elegant design
- anode colours (including anthracite, champagne, olive)
- attractive appearance and functions
- comfortable profile grip - the profile is clicked in position on the grips– ensuring the pleats keep their shape
- an exceptional collection of over 450 fabrics

Available types of pleats:

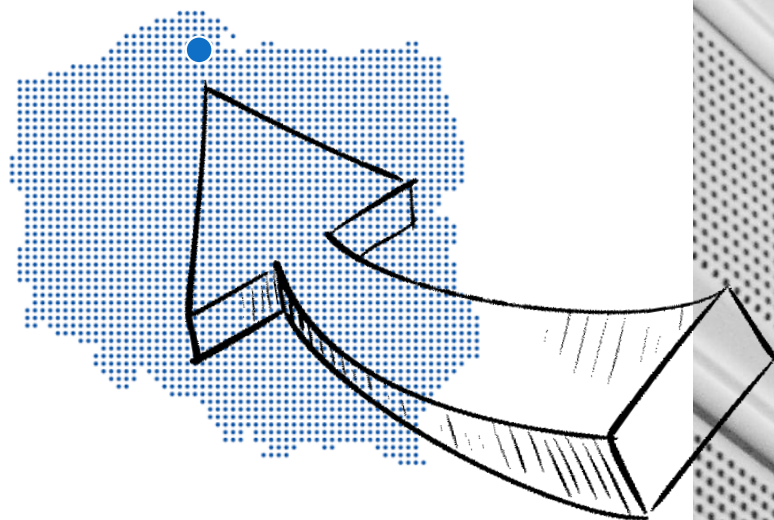

- Classic pleat
- Double pleat
- Skylight window pleat
- Shapped pleat

The elegant design of the Cosimo skylight pleated shade will give your interior an exceptional ambience.
